Chapter 6: Annual Worth Analysis Part 1
This chapter discusses the Annual Worth Analysis (AW) method, which is used to compare the economic viability of different investment alternatives. The AW method involves calculating the annual net benefit (or cost) of each alternative and then comparing these values. The chapter includes several examples and exercises to illustrate the application of the AW method. The examples show how to calculate the AW for different investment alternatives and how to compare them to determine the most economically viable option. The exercises provide practice in applying the AW method to various scenarios.
