B plus or minus the square root of b^2 So now that I've identified a b and c I can replace these variables B is -5 and that will be squared Greetings everyone in this problem we're going to determine each x intercept and zero Term we'll start by taking our B term and dividing it by two so - Intercept what we need to do is we need to set x equal to zero so the equation would be $y =$ Symmetry and that equation is $X = B / \dots$ plug these into the equation so 0 - So 12 to the second power is like saying $12 * \text{itself}$
