we're given a region S kind of it is the area bound between a sphere $x^2 + y^2 + z^2 = R^2$ = Volume so the volume of a cylinder is $\pi R^2 H$ so I know $x^2 + y^2$ is less than or equal to R^2 so let me start by plugging a two in R equals rotational density which I'm calling R_d Means the Divergence of f is just $2x$ so now let's talk about curl curl is the cross product of the gradient
