Fluids flowing near a surface tend to follow the shape of the surface. Using Schlieren optics, we can see this behavior. It is known as the Coanda Effect. Discover how flowing air follows curved surfaces because of the Coanda Effect. Hello! This video explains how planes are able to fly via a completely new way to curl hair. Harnessing the power of air. Text from this movie: "So, one would expect the air to flow out of the fan horizontally in all directions, but due to the Coanda Effect, the air follows the curved surface of the fan. As mundane as this topic may seem to the uninitiated, the differences between the Bernoulli Effect and the Coanda Effect are significant."
