It is a good habit to complete a turn into the correct lane, and for several reasons. Making a proper turn lowers your chances of an accident. When turning right, you must turn into the lane as close to the curve as possible. But at some intersections, there are two lanes of travel. Roundabouts are designed to reduce the chance or severity of a collision at an intersection. Here's a look at the proper use of a roundabout. If your destination is on the other side of the street or you took a wrong turn, a u-turn can help get you going in the right direction. The stop sign is one of the most common traffic signs you'll encounter and it's also one of the most important. The stop sign is a red octagon with the word "STOP" in white. Four-way stops can help slow down traffic in residential areas and prevent a dangerous collision. At a four way stop, you must yield to the vehicle on the right. Rear-end collisions often occur at the entry to highways.

4. Contextual Analysis (Continued)

Continuing our detailed review of 60 Second Driver Yielding, we examine secondary source materials and community-driven data points:

Here's how you can minimize the risk and enter a highway lane safely. Left turns at intersections are more dangerous than right turns because you are crossing lanes of oncoming traffic. Before making a turn, you should check for oncoming traffic. As drivers, we are faced with many distractions on every trip. Being aware of these distractions can ensure we don't get distracted. If you hear the sirens of an approaching emergency vehicle, do you know what to do? When an emergency vehicle with a siren is approaching, police officers, emergency responders and tow truck drivers are often put at risk when they're stopped at the side of the road. The object of parallel parking is to get your car parallel to the curb and within 45 cm of it. Here's the proper procedure: First, you should check for oncoming traffic. Knowing how to share the road with large trucks and buses is important to your safety. These larger vehicles need more space when they're stopped at the side of the road.
