i was really bored so i decided to make a tutorial and teach people what Hi, I plan to make a series of videos on the multi-armed bandit algorithms. Here is the second one: This video explains the multi-armed bandit problem, a core concept in reinforcement learning and decision-making under uncertainty. Making decisions with limited information! In this animated video, we break down the famous K-Armed Bandit problem from reinforcement learning. Imagine you're in front of a slot machine with K arms. Each arm gives a random reward. Your goal is to find the arm that gives the highest reward. This is a classic problem in reinforcement learning.
